

Weltech was established in 1977 to manufacture, install and service environmental monitoring equipment for the food production industry in the UK and abroad. From our head office based in Cambridgeshire, Weltech have developed a wide range of products including Vegetable Weighing Scales, Poultry Weighing Scales and Silo Weighing Systems, Poultry Alarm, Feed Monitoring systems and Water monitoring & control systems.

For more information on Weltech please visit our website: [www.weltech.co.uk](http://www.weltech.co.uk)

## INTRODUCTION

Please take the time to read this manual before using your system.

The Weltech SW8011 is a silo weighing system, designed specifically to monitor the contents of up to 10 silos. The information can then be viewed via the screen integrated on the unit or via external sources such as a computer or printer.

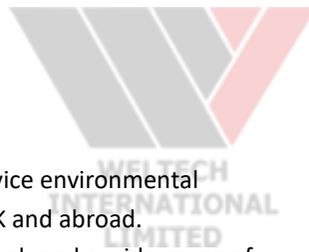

The Weltech SW8011 is designed to work with the silo amplifier supplied by Weltech.

## MENU TREE

The following is an illustration showing where to access all functions of the Weltech SW8011:

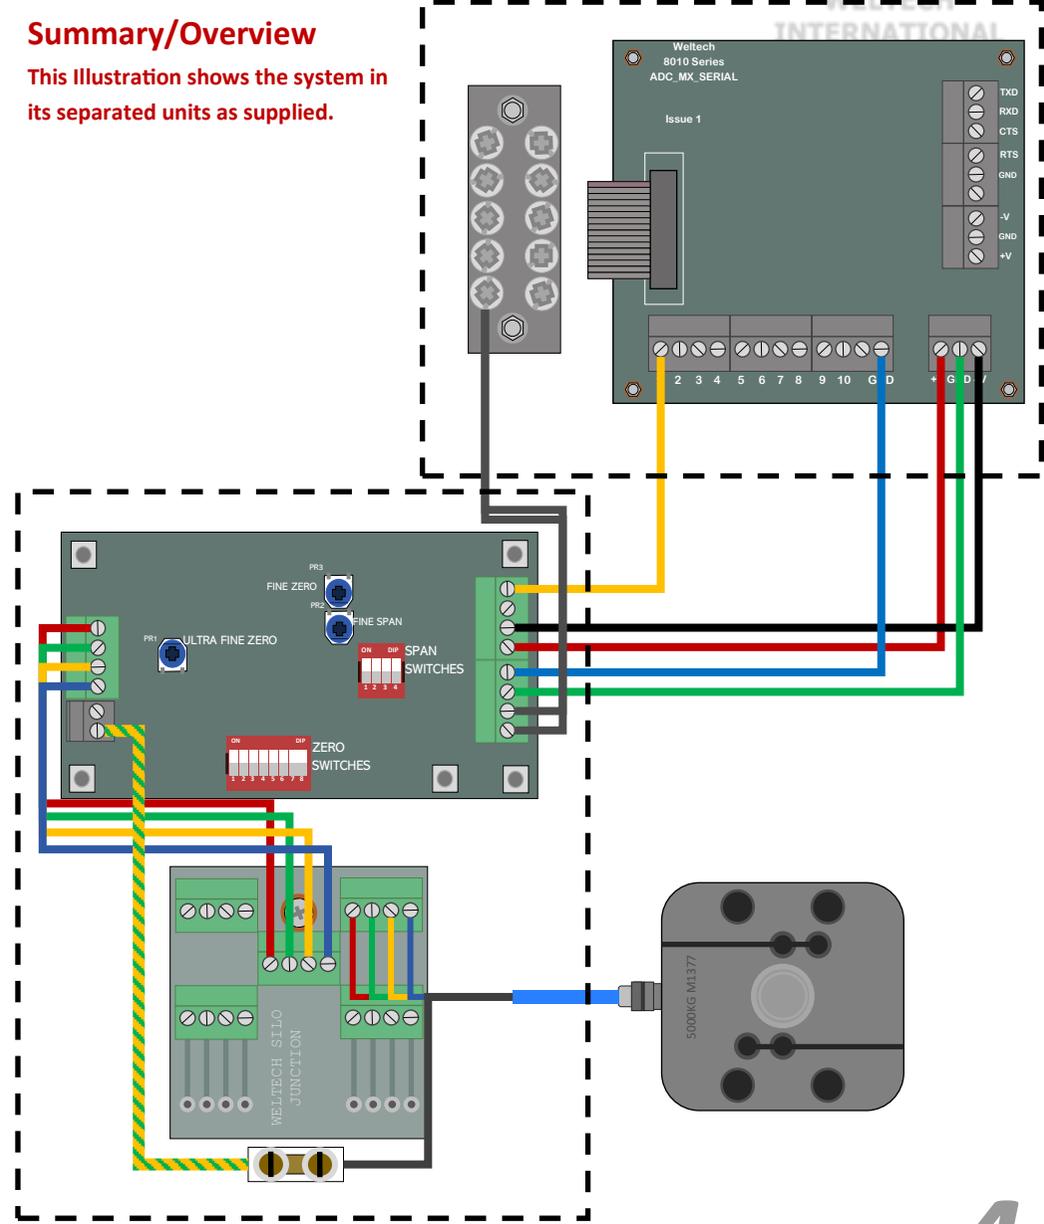

3

# SW8011

## INSTALLATION & WIRING

### Summary/Overview

This illustration shows the system in its separated units as supplied.

\*This is an illustrated representation and the parts may vary in reality, use this as a basic guide. This illustration shows an example of wiring a Complete System.

4

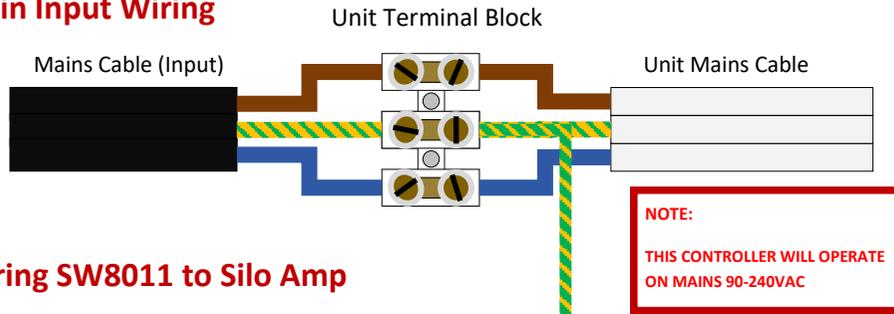

# SW8011

## INSTALLATION & WIRING

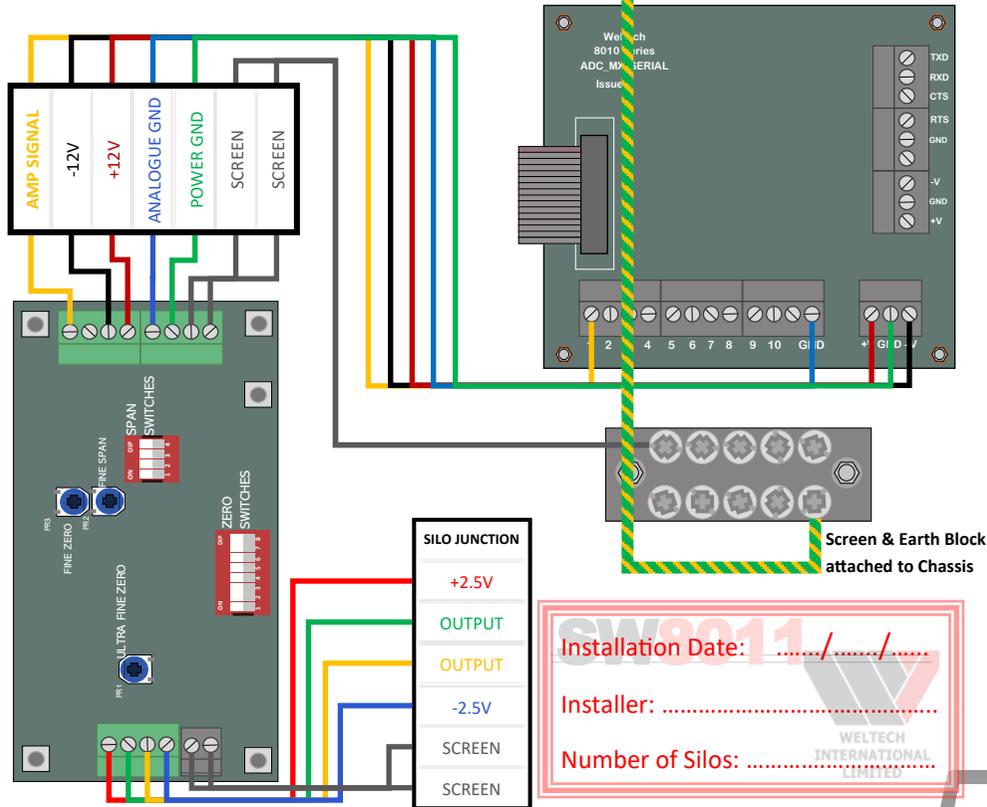

We advise that a Weltech Engineer makes the installations or seek advise before attempting an installation. Please CUT OFF any MAINS SUPPLY before carrying out any work.

### Main Input Wiring

### Wiring SW8011 to Silo Amp

\*This is an illustrated representation and the parts may vary in reality, use this as a basic guide. This illustration shows an example of wiring the Mains Supply & SW8011 to Silo Amp .

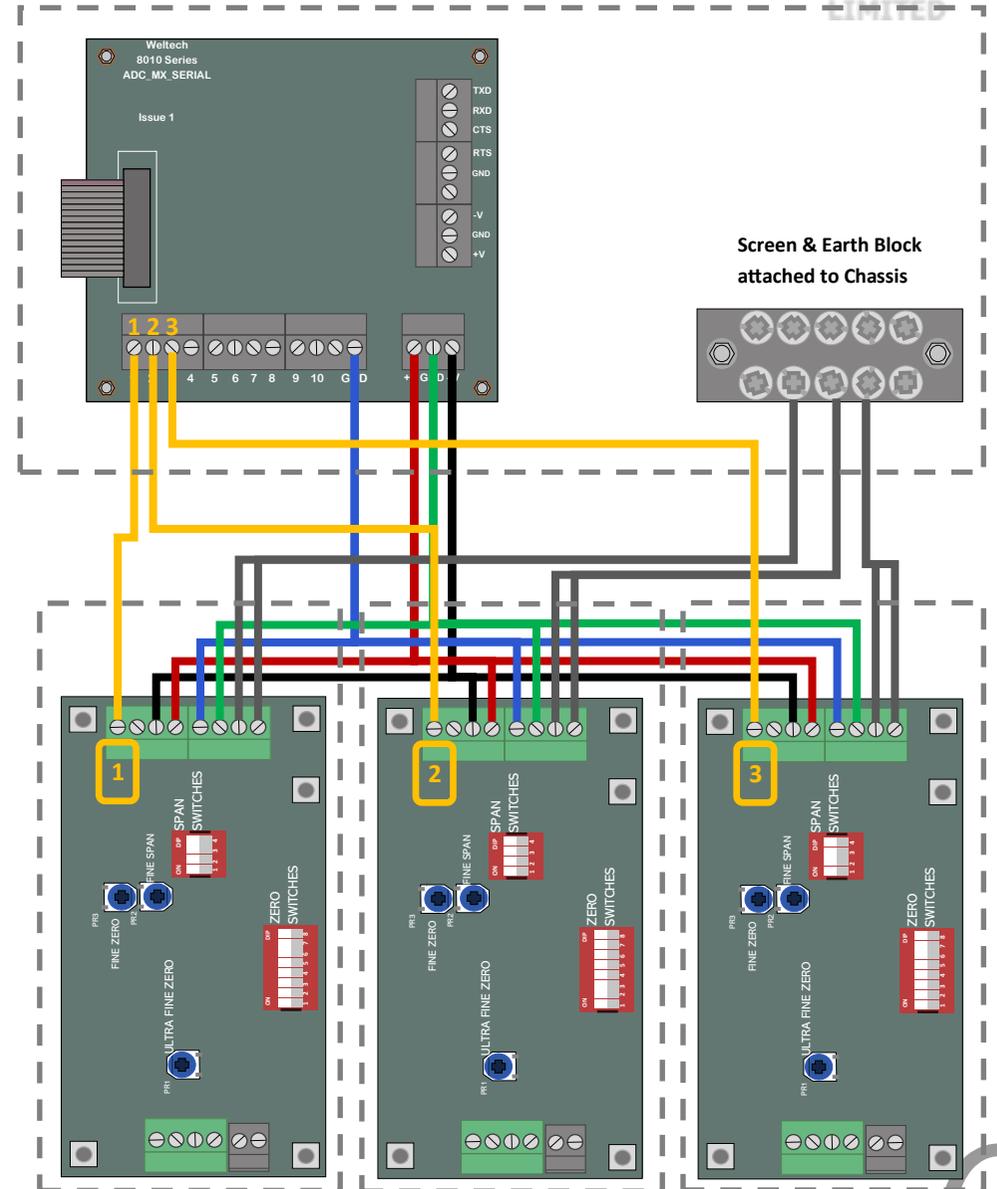

5

# SW8011

## INSTALLATION & WIRING

### Wiring SW8011 to Multiple Silo Amps

\*This is an illustrated representation and the parts may vary in reality, use this as a basic guide. This illustration shows an example of wiring an SW8011 to 3 Silo Amps.

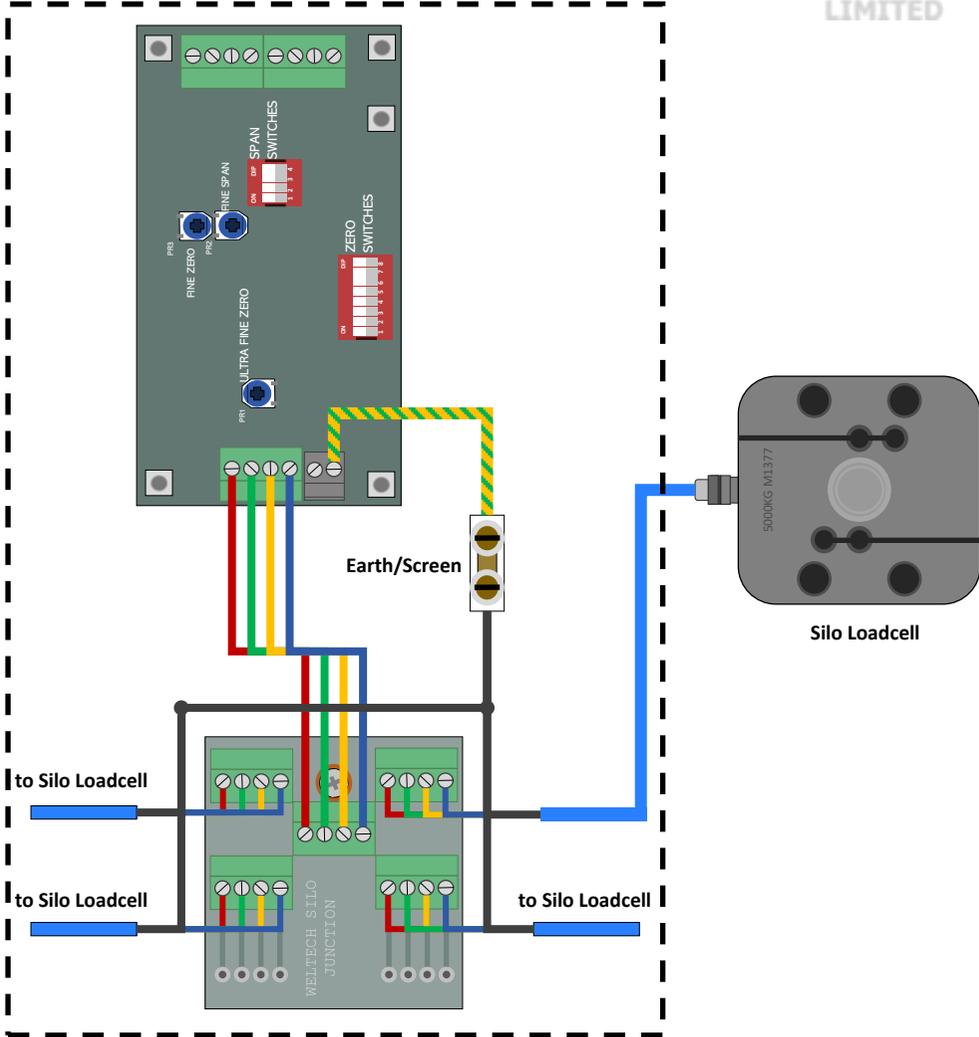

6

# SW8011

## INSTALLATION & WIRING

### Wiring Silo Amp to Silo Junction to Silo Loadcell

*\*This is an illustrated representation and the parts may vary in reality, use this as a basic guide.  
This illustration shows an example of wiring a Silo Amp to a Junction PCB then to a Loadcell.*

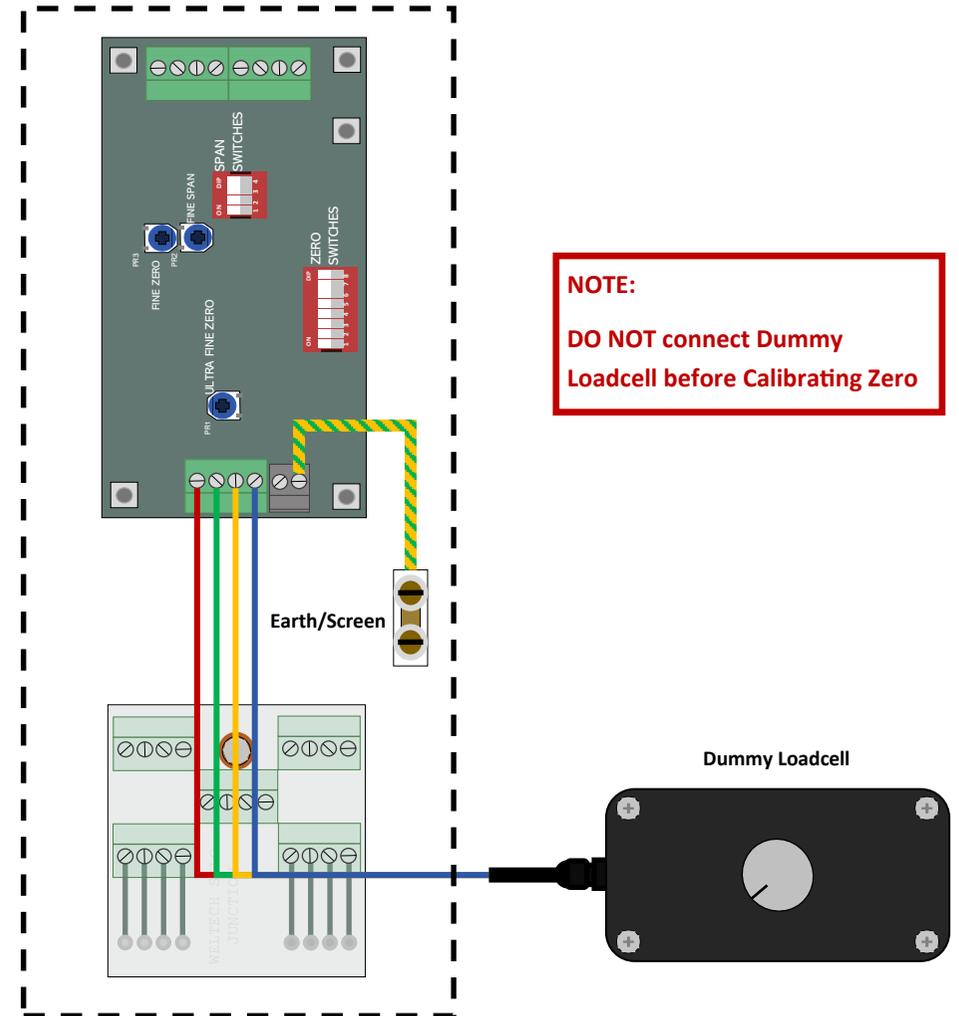

7

# SW8011 CALIBRATION

## Calibrating Zero/Empty Silo

**NOTE: Ensure the Silo is Empty before continuing**

**Ensure the Silo Amp, Silo Junction & Loadcells are connected as shown in the Left Illustration**

1. Using a **Multimeter**, Measure output reading between **YELLOW & GREEN** from **Silo Amp** to **Silo Junction** (usually between **+300mV — +400mV**).  
**\*NOTE THIS READING INSIDE THE CASING AND BELOW**
2. Using the **ZERO SWITCHES**, **FINE ZERO** pot & **ULTRA FINE ZERO** pot on the **Silo Amp**, Set the reading from **YELLOW & GREEN** in Step 1 for **+20mV**.
3. Go to **SW8011 Unit**, Press **OK** to enter **Main Menu**, Press **5** to enter **Setup**, Press **2** to enter **Calibrate Zero**. Select **Silo** to Calibrate then Press **\***.

# SW8011 CALIBRATION

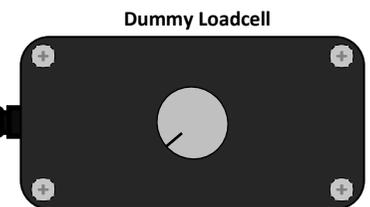

## Calibrating Span/Full Silo using DUMMY LOADCELL

**NOTE: Ensure ZERO CALIBRATION has been completed first.**

**Ensure the Silo Amp is disconnected from Silo Junction & Dummy Loadcell is connected as shown in Left Illustration.**

1. Using a **Multimeter**, while **Measuring** output reading between **YELLOW & GREEN** from **Silo Amp** to **Silo Junction**, Adjust **Dummy Loadcell** for **+10mV** on **Multimeter**.
1. Using a **Multimeter**, while **Measuring AMP SIGNAL** to **ANALOGUE GND** on **Silo Amp**, Adjust **SPAN SWITCHES** & **FINE SPAN** pot for **1.8V** on **Multimeter**.
3. Go to **SW8011 Unit**, Press **OK** to enter **Main Menu**, Press **5** to enter **Setup**, Press **3** to enter **Calibrate Silo**. Select **Silo** to Calibrate, Press **\*** edit (enter the **maximum capacity** of the Silo), Press **OK** to **Confirm**, Press **\*** to **Calibrate/YES**.

# SW8011 CALIBRATION

## Calibrating to Delivery

**NOTE: Ensure ZERO CALIBRATION has been completed first.**

**Ensure the Silo Amp is disconnected from Silo Junction & Dummy Loadcell is connected as shown in Left Illustration.**

- Using a **Multimeter**, while **Measuring** output reading between **YELLOW & GREEN** from **Silo Amp** to **Silo Junction**, Adjust **Dummy Loadcell** for **+10mV** on **Multimeter**.
- Using a **Multimeter**, while **Measuring AMP SIGNAL** to **ANALOGUE GND** on **Silo Amp**, Adjust **SPAN SWITCHES & FINE SPAN** pot for **1.8V** on **Multimeter**.
- Go to **SW8011 Unit**, Press **OK** to enter **Main Menu**, Press **5** to enter **Setup**, Press **3** to enter **Calibrate Silo**. Select **Silo** to Calibrate, Press **\*** edit (enter the **maximum capacity** of the Silo), Press **OK** to **Confirm**, Press **\*** to **Calibrate/YES**.

# SW8011 SETUP

## Key Pad

Button	Function
	Main Menu/Accept/Confirm
	Quit/Navigate Back
	Entering Number Values/Shortcut Keys in Menus/ Lettering Input
	Edit/YES/Confirm
	Navigation through Menus/Changing Setting Values/Enlarge Silo Weight Value in Main Window
	To access summary details: rate, current weigh of silo, delivery start and end data (only accessible from main window)(< to exit)

## Entering Settings Menu

Press **OK** to enter **Main Menu**, press **5** to enter **Setup Menu**, press **1** to enter **Settings**.

Settings Option	Description	Enter Preferred Setting
<b>Time Now</b>	Enter current time	ENTER VALUE HERE
<b>Today's Date</b>	Enter current date	ENTER VALUE HERE
<b>Low Alarm</b>	The lowest acceptable weigh being alarm sounds	0 = DISABLED
<b>High Alarm</b>	The highest acceptable weigh being alarm sounds	ENTER VALUE HERE
<b>Midnight Print</b>	To enable or disable midnight print report summary function	ON
<b>Journal Print</b>	Enable alarm & delivery log on print out	OFF
<b>Write to USB</b>	To enable data transfer via USB (not available on most models)	OFF

# SW8011

## FACTORY SETUP

### Entering Engineer Setup

Press **OK** to enter **Main Menu**, press **5** to enter **Setup Menu**, press **5** to enter **Engineer Setup**, press **1** to enter **Configure**.

Settings Option	Description	Enter Preferred Setting
<b>Farm Name</b>	Enter farm name	ENTER FARM NAME HERE
<b>Address</b>	Enter farm address	ENTER FARM ADDRESS HERE
<b>Unit No.</b>	Individual Identification Number for Farm Use	ENTER VALUE HERE
<b>Backlight</b>	To enable or disable display backlight function	ON
<b>Silo Fitted</b>	Number of Silos fitted to SW8011 unit	ENTER VALUE HERE
<b>Feed Program</b>	Enables or disables silo monitoring functions	OFF
<b>Capacity</b>	To set the maximum capacity of each Silo connected to SW8011 unit	ENTER VALUE HERE
<b>Zero Count</b>		0.0
<b>Scale Factor</b>		10,000KGS
<b>Filter</b>		3
<b>Filter Jump</b>		4000
<b>Stability</b>		25
<b>Stability Jump</b>		20
<b>Modem Rate</b>		9600
<b>Printer Rate</b>		9600
<b>Modem Handshake</b>		OFF
<b>Printer Handshake</b>		OFF
<b>Print Delay</b>	The time delay to print data (used for older printers)	0.1SECS
<b>Printer Linefeed</b>	Sends a line feed to printer after a new line	ON

# SW8011

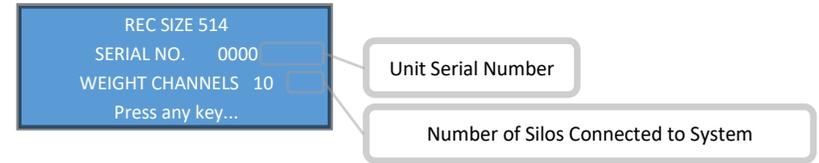

### Factory Reset

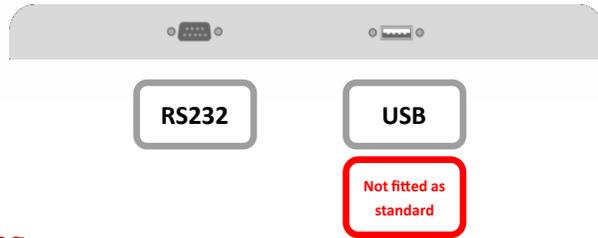

**Note: Performing factory reset will result in all data being lose.**

Press **OK** to enter **Main Menu**, press **5** to enter **Setup Menu**, press **5** to enter **Engineer Setup**, press **5** to enter **Factory Reset**, Press **\*** to **Confirm/YES**.

### Product Information

Press **OK** to enter **Main Menu**, press **5** to enter **Setup Menu**, press **5** to enter **Engineer Setup**, press **4** to enter **Product Info**.

### RS232 Printing

**Connect** external Printer to SW8011 via the **RS232 Socket** on the bottom of the unit. press **OK** to enter **Main Menu**, press **4** to enter **Print Report**, press **1** to enter **All Report**, press **ok** for **All Silos** or Press number key **0-9** to select **Individual Silos**, press **1** to print **Today**, wait for print out and check. Press **2** for **Summary Report**, press **ok** for **All Silos**, press **1** to print **Today**, wait for print . Press **3** for **Inventory**, press **ok** for **All Silos**, wait for print . Press **4** for **Last Delivery**, wait for print . Press **5** for **History Report**, press **ok** for **All Silos**, wait for print . Press **6** for **SW8001b Report**, press **ok** for **All Silos**, press **1** to print **Today**, wait for print . Press **7** for **Alarm Settings**, wait for print .

### Saving Data to USB (not available on all models)

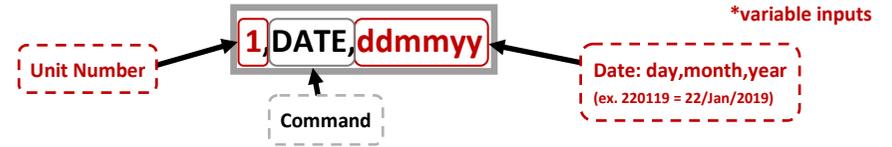

**Connect USB Stick to USB Port** on unit.  
Press **OK** to enter **Main Menu**, press **5** to enter **Setup Main**, press **1** to enter **Settings**. Using directional key > skip to the last option **Write To USB**, change **Value = ON**. Press **CE** to **Quit**, keep pressing until in the **Main Window**.  
Press **OK** to enter **Main Menu**, press **4** to enter **Print Report**, press **1** for **All Report**, press **ok** for **All Silos** or Press number key **0-9** to select **Individual Silos**, press **1** to print **Today**, wait until **File Written OK**.  
Repeat steps in **RS232 Printing** Sections above to transfer **Alternative Reports** to **USB**

### Clearing Data

Press **OK** to enter **Main Menu**, press **5** to enter **Setup Main**, press **4** to enter **Clear Data Log**, press **2** for **Clear Del. Today**, press **ok** for **All Silos**, press \* for **YES**. (to clear todays delivery)  
Press **3** for **Clear Used Data**, press **ok** for **All Silos**, press \* for **YES**. (clear used/printed data)  
Press **4** for **Clear All History**, press **ok** for **All Silos**, press \* for **YES**. (clear all)

### Remote Commands

The SW8011 is designed to connect and communicate with **Datapoll V3.20**.

Unit Number	Command	Variable	description
#,	ID?		Request ID
#,	SER?		Request Serial number
#,	MENU		Unlock the setup menu
#,	CANC		Cancel the alarm
#,	ALARM		Cancel the alarm & request alarm stats
#,	PRON		Enable midnight printout
#,	PROFF		Disable midnight printout
#,	LGON		Enable printer journal
#,	LGOFF		Disable printer journal
#,	DATE,	ddmmyy	Set date (ex. 1,DATE,220119 = set date to unit 1 to 22/01/2019)
#,	TIME,	hhmm	Set Time (ex. 1,TIME,2315 = set time to unit 1 to 11:15pm)
#,	FARM?		Request Farm Name
#,	ADDR?		Request Address
#,	LWGT?,	SILO#/ALL	Request low alarm for individual silo or ALL
#,	HWGT?,	SILO#/ALL	Request high alarm for individual silo or ALL
#,	PRINT.	SILO#/ALL	Print standard reports for individual silo or ALL
